

DUKAL Caliber™ Type VII Gauze Sponges meet the requirements specified to be classified as USP Type VII. The below specifications address the quality and quantity of the yarns used to make the product. The mesh, the thread count per square inch, and the weight in grams per square meter of the gauze are all factors that influence the absorption of gauze and determine this standard.

Caliber™ Type VII Gauze Sponges are made of 100% woven cotton, highly absorbent and offer exceptional clinical performance. They can be used for a number of applications including general care, dressings, prepping, packing, and debriding wounds. Available in sterile and non-sterile. Latex free.

USP Type VII Classification Requirements

Type	Threads per 2.54 cm Warp	Threads per 2.54 cm Filling	Average Count Threads per 6.45 square cm	Weight in grams per square meter
VII	18 to 22	8 to 14	27 to 35	18.1 to 23.1
